## ATI Pegasus

A highly versatile maintenance working platform for professional orchards and industry.

The ATI Pegasus is the first cost-effective two-persons working platform on the market. Through its smooth and low-vibration operation, based on a powerful electric drive, its highly reliable electronic control and the adjustable height of the work cabin, professional orchard work becomes a pleasure.

## Technical datasheet

<b>Motors</b>	DC motors, Nominal output 2,5 KW each	<b>Wheel size</b>	17 x 8.00 - 8
<b>Gearbox</b>	Bevel gearing	<b>Slope rates</b>	Gradient slope 30% Lateral inclination 15%
<b>Breakes</b>	Electromechanical brake system	<b>Working platform length</b>	0,80 m
<b>Steering</b>	Tank steering by means of a joystick	<b>Working platform width</b>	Pulled in: 1,20 m Pulled out: 2,80 m
<b>Control</b>	Forward and reverse drive directions by means of a joystick	<b>Working platform height</b>	Lowest position: 0,85 m Highest position: 2,00 m
<b>Batteries</b>	4x 12V dry cell batteries 150Ah each. Working autonomie ≈ 14h	<b>Total height</b>	2,20 m
<b>Battery charger</b>	Standard equipment 30A electronically controlled. Charging time: 10 – 12 hours	<b>Total length</b>	1,80 m
<b>Driving speed</b>	Continuously adjustable from 0 – to max. 3 km/h	<b>Total width</b>	1,40 m
<b>Weight</b>	Empty approx. 865 kg, max. payload 200 kg
