ATI E-Transporter

A reliable partner for all indoor and outdoor transports and in alpine regions.

Through its powerful traction, the ATI E-Transporter can be operated in steep areas as well as on any difficult grounds. The ATI E-Transporter is especially advantageous for greenhouse cultivations of any kind. The adjustable loading platform makes its use highly versatile.

Technical datasheet

Motors	2 DC motors, nominal output 1.1 KW each	Driving speed	Continuously adjustable from 0 – to max. 3 km/h
Gearboxes	Self-impeding worm gear system	Climbing capacity	20%
Brakes	Electromechanical brake system with a worm gear system	Weight	Empty 200 kg, max. payload 200 kg
Steering	Tank steering	Wheels	16 x 6.50-6
Drive Control	Driving control with a joystick	Loading space	Length: 1,06 m width 0.70 m, expanded: length 1,46 m width 1,16 m
Batteries	2 x 12V dry cell batteries 110Ah each. Working autonomie ≈ 10h	Length	1,34 m
Battery charger	Standard 10A including electronic control. Charging time: 10 – 12 hours	Width	0,75 m
